

Navy Year 2000 Tracking System (NY2KTS)
Software Release Notes
Version 2.4.01
24 June 1999

- 99-47 Modified the Change Password Function to keep track of when the user actually changes their Password.
- 99-48 Changed the F&I Reporting process to use Oracle Stored PL/SQL procedures to calculate the totals for these reports. Since Oracle Reports sends all the data back to the Web Server for processing the stored procedures are used to calculate the totals on the Database Server and send ONLY the summary totals to the Web Server for formatting and printing. This was done to increase performance and reduce the amount of time it required to print the following reports:
- F & I Activity Phase & Strategy Counts, by Claimant
 - F & I Activity Phase & Strategy Counts, by Claimant & Activity
 - F & I Embedded IT Devices Compliancy Status

Modules Affected:

Main Menu	RPT_MENU
System Password Change Window	CHANGE_PASSWORD
F & I Activity Phase & Strategy Counts, by Claimant – PL/SQL Stored Procedure	GET_Y2KFAC02R05_TOTALS
F & I Activity Phase & Strategy Counts, by Claimant	Y2KFAC02R05
F & I Activity Phase & Strategy Counts, by Claimant & Activity – PL/SQL Stored Procedure	GET_Y2KFAC02R06_TOTALS
F & I Activity Phase & Strategy Counts, by Claimant & Activity	Y2KFAC02R06
F & I Embedded IT Devices Compliancy Status - PL/SQL Stored Procedure	GET_Y2KFAC02R07_TOTALS
F & I Embedded IT Devices Compliancy Status	Y2KFAC02R07
